

Nandita Saini

Software Development Engineer

saininandita77@gmail.com | +91-8279300447 | LinkedIn

SUMMARY

Results-driven Software Developer with 3 years of experience building scalable web applications and APIs using Laravel and modern backend technologies. Skilled in performance optimization, security, and system design, with a proven track record of improving efficiency, reducing latency, and delivering reliable production systems.

EXPERIENCE

Sahir Web Solutions <i>PHP Developer</i>	Aug 2023 – April 2026 Chandigarh, India
- Engineered and scaled 5+ web applications using Laravel and CodeIgniter, designing robust backend systems for authentication, workflows, and business logic - Architected and delivered 20+ RESTful APIs, enabling seamless integration across web and mobile platforms - Optimized MySQL queries and database performance, reducing response time by ~30% and improving system efficiency - Accelerated development velocity by ~25% using AI-assisted tools (ChatGPT, Claude, Ollama) and ensured high API reliability through rigorous testing with Postman	
Blue Planet Info Solutions Pvt. Ltd. <i>PHP Developer Intern Security Analyst</i>	July 2021 – Oct 2022 Remote
- Identified and resolved XSS vulnerabilities, improving application security - Reduced production issues by fixing 15+ bugs across internal platforms - Developed and enhanced features for Campus Radio & Campus TV systems - Integrated third-party services (Vimeo), improving media functionality	

EDUCATION

Quantum University, Roorkee, India <i>Bachelor of Technology in Computer Science</i>	Roorkee, India Aug 2019 – July 2023
Skyward Sen. Sec. School <i>Intermediate</i>	Roorkee, India April 2018 - March 2019
Skyward Sen. Sec. School <i>Matriculation</i>	Roorkee, India April 2016 - March 2017

PROJECTS

SBI Sewa Portal Laravel Full-Stack System - Engineered a full-stack employee service platform with scalable APIs and booking workflows - Automated internal processes, reducing manual effort by 30% and improving operational efficiency - Designed real-time availability system, increasing booking accuracy - Integrated Firebase notifications for real-time user engagement
IoT Data Logger Platform Laravel - Scaled real-time data platform handling 300+ IoT devices with high-frequency ingestion - Optimized large-scale query performance, significantly reducing latency and system bottlenecks - Refactored backend architecture to improve system reliability and processing efficiency
Perfex CRM Custom Module (Points System) CodeIgniter - Designed and implemented a performance tracking module with role-based access control - Increased user engagement through dynamic scoring system and analytics dashboards - Optimized computation logic, improving data processing speed and dashboard responsiveness
AI Call Processing & Automation System - Built AI-powered call summarization and transcript analysis system - Reduced unnecessary AI executions, lowering operational costs and improving efficiency - Automated workflows using n8n, streamlining processing and reducing manual intervention
AI-Based Website Optimization & Security - Strengthened application security by mitigating SSRF vulnerabilities and removing malware - Secured sensitive API keys, preventing unauthorized access and improving compliance

- Enhanced system reliability through robust frontend and backend validation mechanisms

SKILLS

Languages: PHP, JavaScript, jQuery, HTML5, CSS3

Frameworks: Laravel, CodeIgniter, Basic React.js

DevTools: Git, GitHub, Bitbucket, Jenkins (CI/CD), Postman, VS Code, PuTTY, FileZilla

Cloud: Google Cloud, Cloud Engineering & Machine Learning

ACHIEVEMENTS

- Selected participant in Smart India Hackathon 2022, solving real-world problems in a competitive team environment
- Contributed to open source through Hacktoberfest and participated in Google Summer of Code, gaining hands-on experience in collaborative software development
- Completed 30 Days of Google Cloud (Cloud Engineering & Machine Learning tracks), building practical knowledge in cloud infrastructure and ML
